

RDW

Test report no.: RDW -13R - 0025092

TEST REPORT

Concerning the braking system of certain categories of motor vehicles corresponding the ~~Directive of the Council 71/320/EEC as last amended by the Commission Directive 2002/78/EC and ECE Regulation no. 13.11 up to and including supplement 11.~~

- 0.1. Make : JMR
0.2. Type : SC
Variety : 3-axle full trailer
0.4. Category of vehicle : O2
0.5. Name and address of the manufacturer : JMR trading BV
Weusdijk 1
7261 NG Ruurlo
the Netherlands

Tests conducted by order of : See item 0.5.

Tests : The tests have been conducted according to ~~Annex I, II, III, IV, V, VI, VII, VIII, X, XI, XII, XIII, XIV and XV of the above mentioned Directive and/or Annex 4, 5, 6, 7, 8, 9, 11, 12, 13, 14 and 15~~ of the above mentioned Regulation.

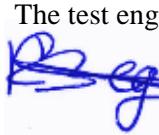

Documentation : JMR 201401, total 2 pages.

Conclusion : The type of ~~motor~~ vehicle does/~~does not~~* comply with the stated requirements and there ~~are~~ / are no* objections against approval according to the above mentioned Directives and Regulation.

Test date(s) : 13-11-2014

By : R. Begeman/ X. v/d Berg/ L. Vellekoop

Item 5 Specifications		
5.2.2.2.	Braking system O2 continuous or semi continuous or inertia. Electrical braking system conforming Annex 14 shall be permitted	PASS / FAIL
5.2.2.4.1	The service braking shall act on all wheels of the trailer	PASS / FAIL
5.2.2.4.2	The service braking shall distribute its action appropriately among the axles	PASS / FAIL
5.2.2.5	Action of braking symmetrically to longitudinal median plane of the vehicle.	PASS / FAIL
5.2.2.7.	Braking surfaces in constant connection with the wheels.	PASS / FAIL
5.2.2.8.	wear of brakes shall be easily compensated	PASS / FAIL
5.2.2.8.1.	wear adjustment shall be automatic, optional for O2	PASS / FAIL
5.2.2.8.2.	Possible to easily check wear	PASS / FAIL
5.2.2.8.2.2.	This information shall be made freely available e.g. vehicle handbook or electronic data record.	PASS / FAIL
5.2.2.9.	Trailer is stopped automatically if coupling separates	PASS / FAIL
5.2.2.10	Parking braking when trailer is separated from towing vehicle. Actuating by a person standing on the ground	PASS / FAIL

Annex 14

1.1	Control device on the trailer?	PASS / FAIL
1.2	Electrical energy supplied to the trailer by the motor vehicle	PASS / FAIL
1.3	Actuated by the operating of the service brake of the motorvehicle	PASS / FAIL
1.4	Nominal voltage rating 12 V	PASS / FAIL
1.5	Max. current consumption not higher than 15 A	PASS / FAIL
1.6	The connection: - special connector - not fit the lighting connect - plug and cable shall be on the trailer	PASS / FAIL
2.1	Battery on trailer must be separated during service braking of the trailer	n/a
2.2	Min. mass less than 75% of max Mass a load sensing device is mandatory	PASS / FAIL
2.3	When the connection line is reduced to 7 V 20% braking effect of the max laden weight shall be maintained	PASS / FAIL
2.4	-It must be possible to adjust manually the position of the	PASS / FAIL

RB

	deceleration indicator. -The device shall clearly indicate the horizontal position	
2.5	The relay for actuating the braking current shall be positioned on the trailer	PASS / FAIL
2.6	Is there a dummy socket for the plug	PASS / FAIL
2.7	There shall be a tell-tale: -lighting up with every application -indication the proper functioning of the electrical braking system	PASS / FAIL
3.1	Does brake system respond at combination deceleration of not more than 0,4 m/s ²	PASS / FAIL
3.2	Initial brake pressure not higher than 10% of the max.stat. axle load and 13% of the unladen axle load	PASS / FAIL
3.3	is the brake force increased by steps than it should fulfil these demands	n/a
3.4	the minimum braking force of 50% shall be attained at not more than 5,9 m/s ² combination deceleration	PASS / FAIL See page 3
3.6	When coupling is separated while it is in motion minimal performance is 25% for minimal 15 minutes	PASS / FAIL (mechanical)
